Vortex Amplifiers

Ultra lightweight, switch mode (3 stage) amplifiers with innovative protection against under & over voltage plus malfunction. Fully networkable & "digital ready". These amps have an extremely high slew rate due to their current coupled output stages. Output control is via a 12-bit, digital to analogue DCA converter. Thermal stability is ensured via a completely new design optimising airflow & heat dissipation.

- * Stereo Power 8 Ohms = 930W / ch
- * Stereo Power 4 Ohms = 1570W / ch
- * Stereo Power 2 Ohms = 2300W / ch
- * Bridge Power 8 Ohms = 3140W (mono)
- * Bridge Power 4 Ohms = 4600W (mono)
- * Output Voltage (peak) @ 8Ω = 130V
- * Net Weight 11.7 Kg

£2,900.00

- * Stereo Power 8 Ohms = 1350W / ch
- * Stereo Power 4 Ohms = 2300W / ch
- * Stereo Power 2 Ohms = 3300W / ch
- * Bridge Power 8 Ohms = 4600W (mono)
- * Bridge Power 4 Ohms = 6600W (mono)
- * Output Voltage (peak) @ 8Ω = 150V
- * Net Weight 12 Kg

£3,700.00

200 Volt internal power supply model specially designed to deliver high power into higher impedance loads.

- * Stereo Power 16 Ohms = 1040W / ch
- * Stereo Power 8 Ohms = 1880W / ch
- * Stereo Power 4 Ohms = 3100W / ch
- * Stereo Power 2 Ohms = 2600W / ch
- * Bridge Power 8 Ohms = 6200W (mono)
- * Bridge Power 4 Ohms = 5200W (mono)
- * Output Voltage (peak) @ 8Ω = 130V
- * Net Weight 12.2 Kg

£4,300.00

Vortex 'Silver Series' Amplifiers

The evolution of technology, its application and the resulting real world solutions are at the heart of every Camco product. With the introduction of the new "Silver Series V8" Camco are once again pushing the boundaries of power, performance, sonic integrity and integration. A key part of the new V8 design is the absence of any control knobs or switches, front or back. Control of all parameters is via the screen user interface and gain slider. This clean, practical approach reduces wear & tear factors on moving parts while delivering a forward thinking approach to function, safety and plain good looks.

Vortex 8 Specifications:

- * Stereo Power 8 Ohms = 2000W / ch
- * Stereo Power 4 Ohms = 3450W / ch
- * Stereo Power 2 Ohms = 3750W / ch
- * Bridge Power 8 Ohms = 6900W
- * Bridge Power 4 Ohms = 7500W
- * Output Voltage (peak) @ 8Ω = 200V
- * Net Weight 13 Kg

£4,800.00

Optional internal DSP card to fit Vortex 8

£230.00

Q Power Amplifiers

The Camco Q-Power Series is a new range of 4 channel, high output power amplifiers. There are three models in the Series, the Q-Power 4, Q-Power 6 and Q-Power 10, all of them 19" 2RU amps using class D and class H technology and benefitting from developments in CAMCO's proprietary dual-voltage SMPS with automatic voltage selection for 120V/230V operation. Suitable for live sound and theatre applications, the Q-Power will quickly find favour with professional installers who will find these units flexible and cost-effective.

CA.Q4

- * 840W per channel at 4 Ohms
- * 528W per channel at 8 Ohms

£2,050.00

CA.Q6

- * 1000W per channel at 4 Ohms
- * 800W per channel at 8 Ohms

£3,050.00

CA.Q10

- * 1800W per channel at 4 Ohms
- * 1100W per channel at 8 Ohms

£4,050.00

D Power Amplifiers

Following on from the Q-Power series, the new D-Power series develops the range further with three 2 channel models. Each model has been designed to provide that powerful pure sonic performance which is now so synonymous with the CAMCO brand name. They utilise a Hybrid Class H amplifier engine, offering smooth and responsive handling throughout the power range. All models benefit from the latest advances in CAMCO's SMPS technology and the resulting lightweight units are at home in all professional applications. Used in combination with the Q-Power series or on their own, the D-Power series delivers pure and reliable power for applications where cost and ease of use are paramount without loss of integrity.

CA.D05

- * 250W per channel at 4 Ohms
- * 125W per channel at 8 Ohms

£880.00

CA.D1

- * 500W per channel at 4 Ohms
- * 250W per channel at 8 Ohms

£1,150.00

CA.D2

- * 1216W per channel at 4 Ohms
- * 698W per channel at 8 Ohms

£1,250.00

CA.D3

- * 1600W per channel at 4 Ohms
- * 918W per channel at 8 Ohms

£1,450.00

CA.D4

- * 1900W per channel at 4 Ohms
- * 1123W per channel at 8 Ohms

£1,650.00

CA.D7

- * 3300W per channel at 4 Ohms
- * 2300W per channel at 8 Ohms

£2,900.00

Remotes

CA.ETHERCAI

The Ethercai Interface is designed to interface a computer ethernet connection with the RS-485 communication protocol used to communicate with the Vortex range of amplifiers. Using the interface and Cibus software (available free of charge - see our website) it enables control and monitoring of all amplifiers in the system. Only one of these devices is required for most systems. However, if amplifiers are scattered over a wide area in a venue it may be necessary to add more interfaces to make the system easier to wire up. Multiple devices can co-exist quite happily on the network.

£466.00

CAMCO products purchased after 1st January 2006 are covered by a 6 year manufacturer's warranty from date of first purchase. Pre-2006 products carry a 3 year warranty.
